

AZ-305T00: Designing Microsoft Azure Infrastructure Solutions

Course outline

Module 1: Design compute and application solutions

In this module you will learn about governance, compute, and application architectures.

Lessons

- Design for governance
- Design for compute solutions
- Design for application architectures

Lab: Case studies

After completing this module, students will be able to:

- Design a governance solution.
- Design a compute solution.
- Design an application architecture.

Module 2: Design storage solutions

In this module, you will learn about non-relational storage, relational storage, and data integration solutions.

Lessons

- Design a non-relational storage solution.
- Design a relational storage solution.
- Design a data integration solution.

Lab: Case studies

After completing this module, students will be able to:

- Design non-relational storage solutions.
- Design relational storage solutions.
- Design a data integration solution.

Module 3: Design networking and access solutions

In this module you will learn about authentication and authorization, identity and access for applications, and networking solutions.

Lessons

- Design authentication and authorization solutions
- Design networking solutions

Lab: Case studies

After completing this module, students will be able to:

- Design authentication and authorization solutions.
- Design network solutions.

Module 4: Design business continuity solutions

Lessons

- Design for backup and disaster recovery
- Design monitoring solutions
- Design for migrations

Lab: Case studies

After completing this module, students will be able to:

- Design backup and disaster recovery.
- Design monitoring solutions.
- Design for migrations.
